### Creation of a fun universe for young children

The spaces to be converted are situated on the ground floor in the town hall of the 10th district of Paris, at the angle of the streets Hittorf and Pierre Bullet. The program included the design of a childcare centre for 30 children on a surface of 410 m<sup>2</sup>. To benefit from the natural light which penetrates through the windows along the street Pierre Bullet, it was decided to install the children's play rooms along this wall. The rooms, that do not require daylight, are situated in the darker sections at the back of the building. There is a continuous image wall running along the entire length of the room between functional spaces and the accessible spaces for the children. This screen is decorated by a mural image which incorporates a fun element into the childcare centre. Realized by a graphic designer, it represents nature to compensate for the lack of an outdoors area.

Call for tender  
 Surface: 410 m<sup>2</sup>  
 Const. time: 8 months  
 Client: City of Paris  
 Location: 98 quai de la Râpée F-75012 Paris  
 Programme: Day-care centre  
 Mission: Design, tender, construction supervision

Design + Construction  
 Building costs BT: 615 k€  
 Completion: 2007

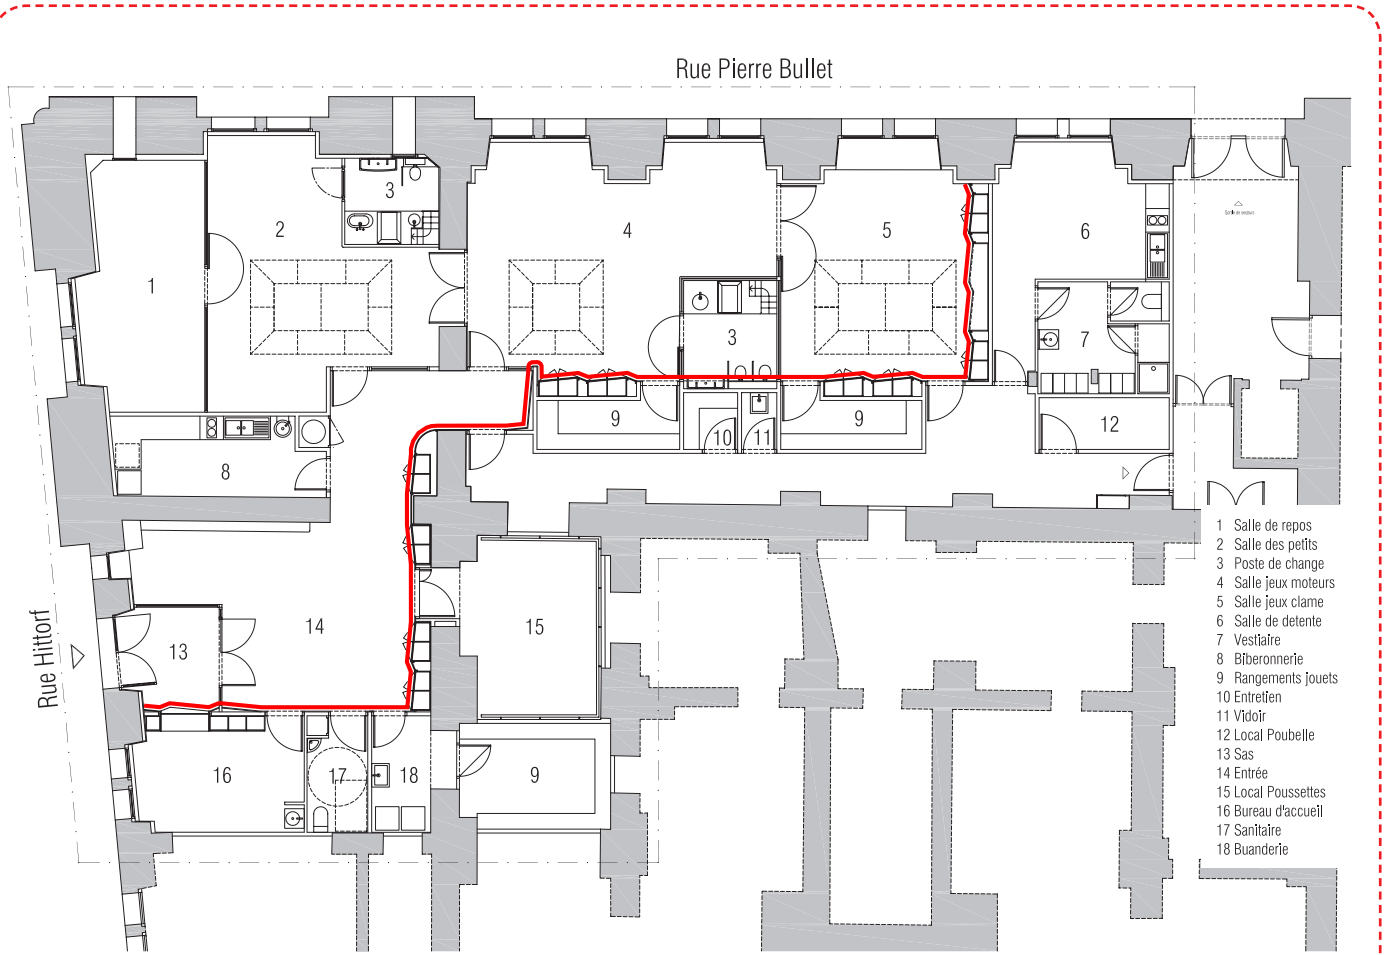

## DAY-CARE CENTRE - PARIS

Interior design of a day-care centre - Paris 2005-07

Rethink (representative) with Bettina Mau, architect, Delphine Chedru, graphic design, LGX, engineering

Plan of the day-care centre

**A thick wall as fun element**

It is a screen with an image referring to nature, which envelops the spaces of the public and children over a length of 35m and a surface of 100m<sup>2</sup>. He participates in the animation of the play rooms and incorporates cupboards and reading spaces.
